Subject: This is for everyone including the corrupt.

I think we should focus on one subject at a time.

I.e. bring specification into one subject and then also bring specification on vivendi-water and what brought you and me together.

So we have one topic on every show and bring it back to local politics-corruption that your audience can follow.

Maybe one show would be history, because we do need to cover it, starting with Boer War in order to grasp De Beers. There is no other way.

Maybe there should be one show just on The Diamond Invention book. Have you read the Diamond Invention.

And we can bring up the book I am writing which is all about the history of money creation and its future.

Marie thought you were really good and you have this real comic spontaneity, "its like he is made for radio".

There few parts where we, mainly me, went off the subject, which shows it is not contrived, it is more conversational, like it evolves not preset, it is not very controlled question-answer where you know exactly what I am going to say, it makes it very live.

I can be purposefully lengthy and you capsule well. We compliment each other.

Your best was, "it gives me nervous breakdowns reading this stuff"

Marie says, "It is everyone's feeling".

We are talking about democracy, freedom and most of all truth; and the truth is we are one people who could be ALL instantly woken up and EMPOWERED.

This is for everyone including the corrupt.

We have to give the option of change.

Truth is that which does not change.

Ps - You NEED to read the Diamond Invention. You will be captivated, I am sure, and then you can follow with the missing links that I provide. You can connect the dots.
